

# B-440 Burnishing Compound

## PRODUCT DESCRIPTION

B-440 is a general purpose burnishing compound. It produces a bright finish, with excellent color on a wide variety of ferrous and non-ferrous metals. This product was specifically formulated to generate high lubricity within the mass to produce highly reflective finishes. A high quality build of ingredients allows for extended cycle times and optimum finishes.

## PHYSICAL PROPERTIES

Appearance	Beige Powder
pH @ 1% solution	9.1
Odor	Mild
Foaming action	Moderate
Solubility in water	Partial
Rinsing action	Excellent
Metal Safety	All Metals
Standard Container	300 lb. Drum
Bulk Density	40 lbs.cu.ft.

*Progress Chemical guarantees its products will perform to your satisfaction when used in accordance to our recommendations. We back this guarantee with over 50 years experience. Our company has been certified to ISO 9001:2000 Quality Standards.*

## USAGE AND DILUTION INSTRUCTIONS

Use 1 to 4 ounces per gallon in rotary barrel finishing operations. Water to mass ratios will effect the type of finish produced. This product may be used with a wide variety of medias or part on part.

## HANDLING AND STORAGE INSTRUCTIONS

Use good industrial hygiene methods such as wearing gloves, impermeable apron, eye protection and washing after handling product. Store product in a cool dry place. Closing plastic liner when not in use will help prevent caking. Rotate stock. When stored as stated above, shelf life is a minimum of 2 years.

*Refer to our Material Safety Data Sheet for additional information.*
